

45 research activated patients

Data is from the AllStripes VCP research cohort of 45. This information is self-reported, including diagnosis.

## Sex & age

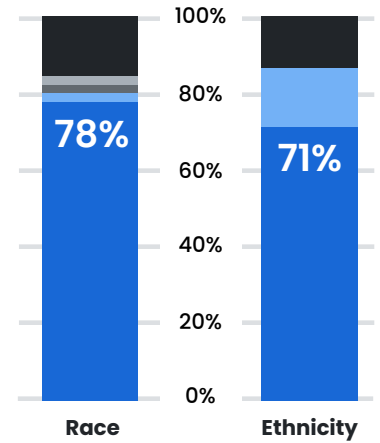

Of the 45 VCP patients, 56% or 25 patients are female.

The VCP cohort spans a wide age range (<39 to >70 years) with the most patients falling in the 60-64 years old range. The median age is 55 years and the mean age is 54.7 years.

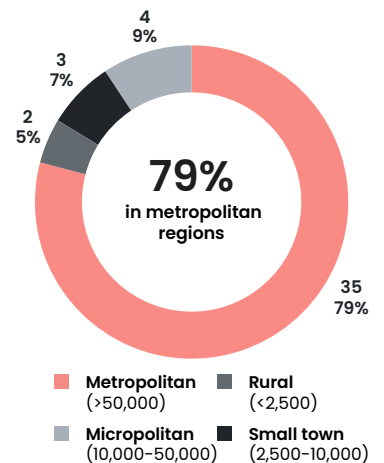

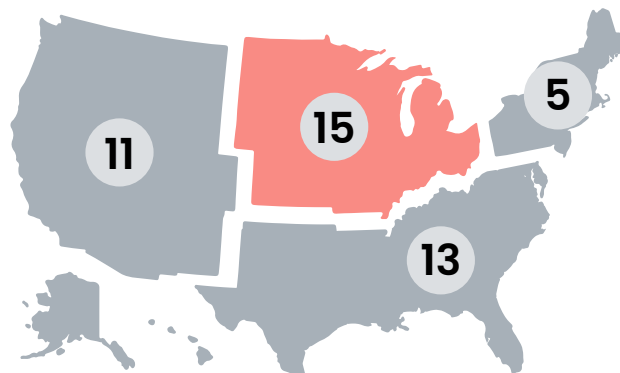

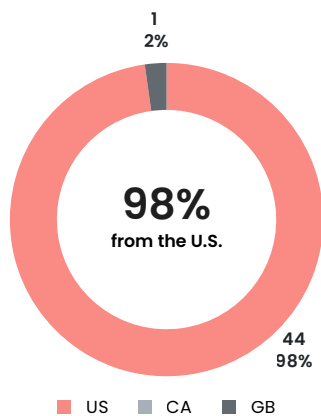

## Race & ethnicity

- White (35) 78%
- Multi-racial (1) 2%
- Asian (1) 2%
- Native American (1) 2%
- Prefer not to say (7) 16%
- Non-hispanic (32) 71%
- Hispanic (7) 16%
- Prefer not to say (6) 13%

The VCP cohort is composed of mostly white and non-hispanic patients.

## Regional distribution

Most (98%) of the VCP cohort resides in the United States. These patients are distributed throughout the U.S. with the greatest presence in the Midwest. Throughout the U.S., the cohort predominantly resides in metropolitan areas of more than 50,000 residents (79%).

AllStripes would like to thank **Cure VCP Disease, Inc** for their partnership in growing this research community. AllStripes would also like to thank the patients, families and caregivers who have generously contributed data.
